Election/Restrictions

1. Applicant's election without traverse of group I in the reply filed on 04/20/2009 is acknowledged. However, upon further prosecution of the case, multiple species of invention are noted in the elected group.
2. The elected group I (claims 18-35) contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A) - claims 19-20, 23, wherein the image recording device and the image processing device are configured so that, immediately before the transfer of the droplet, a meniscus height or a shape of the droplet can be determined.

B) - claim 22, wherein the image recording device and the image processing device are configured so that, the distance of the end of the capillary tube or the needle to the substrate or the distance of the droplet to the substrate can be detected.

C) - claim 24, wherein the image recording device and the image processing device are configured so that, a point in time of the transfer of the droplet can be detected by determining a detected characteristic surface which changes at the time of the transfer.

D) - claims 25&26, wherein the image recording device and the image processing device are configured so that, before the transfer, a first surface defined by at least a part of the droplet can be detected, and at the time of or after the transfer, a

second surface defined by at least the part of the droplet and a mirror image of the droplet can be detected.

E) - claim 27, wherein the image recording device and the image processing device are configured so that, a change in a width of the droplet or of a meniscus, beyond a threshold value, can be detected at the time of the transfer.

F) - claim 28, wherein the image recording device and the image processing device are configured in such a way that a change in a surface in a work window beyond a threshold value, can be detected at the time of the transfer.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claims 18, 21, 29-35.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: as between the

species, the configuration of the image recording device and the image processing device is not a common technical feature.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
